Definitions

Market Value is the estimated value for 1-3 family homes based on recent comparable sales.

Assessment Percentage is a fixed percentage of Market Value that is set by law. For class 1 properties, it is 6%.

Assessed Value (AV) is calculated by multiplying your Market Value by the Assessment Percentage. A cap on AV imposed by New York State law can affect your Assessed Value. Your AV cannot increase more than 6% a year or 20% over five years unless you have made a physical change to your building.

Effective Market Value is calculated by dividing the AV by the Assessment Percentage. Your Effective Market Value of \$332,566 is calculated by taking the AV of \$19,954 and dividing it by 6% (.06).

Exemption Value is the amount of property tax benefits you currently have (except for abatements, which are not listed above but are listed on your property tax bills). This value is subject to change. If you recently applied for exemptions, they may not be listed. If you would like to apply for any personal homeowner exemptions, please submit your application by March 16, 2016. Other exemptions have different deadlines. For more information about exemptions, visit nyc.gov/ownerexemption or contact 311.

Taxable Value is the Assessed Value minus the Exemption Value.

Estimate your property taxes for 2016/17 by multiplying your Taxable Value by the current tax rate, and then subtract abatements. The result will be an estimate of your property taxes for 2016/17.
