Market Value is Finance's estimate of your property's value.

Effective Market Value is calculated by dividing the assessed value by the level of assessment. This value reflects limitations on assessment increases as required by state law.

Assessed Value is calculated by multiplying the market value by the class one **level of assessment**, 6%, but may be less because assessment increases for class one properties are limited as required by state law. Assessment increases for class one properties may not exceed 6% per year and 20% over any five-year period.

Exemption Value is the value of any exemptions currently in Finance's records.

Taxable Value is the assessed value less any applicable exemptions.

If you disagree with your property value:

You may file an Application for Correction of Assessed Value with the New York City Tax Commission no later than March 15, 2012. However, your assessed value will not be reduced unless you can demonstrate that the value of your property is less than the Effective Market Value of \$251,300.
